

## Download, Convert, and Save YouTube Videos

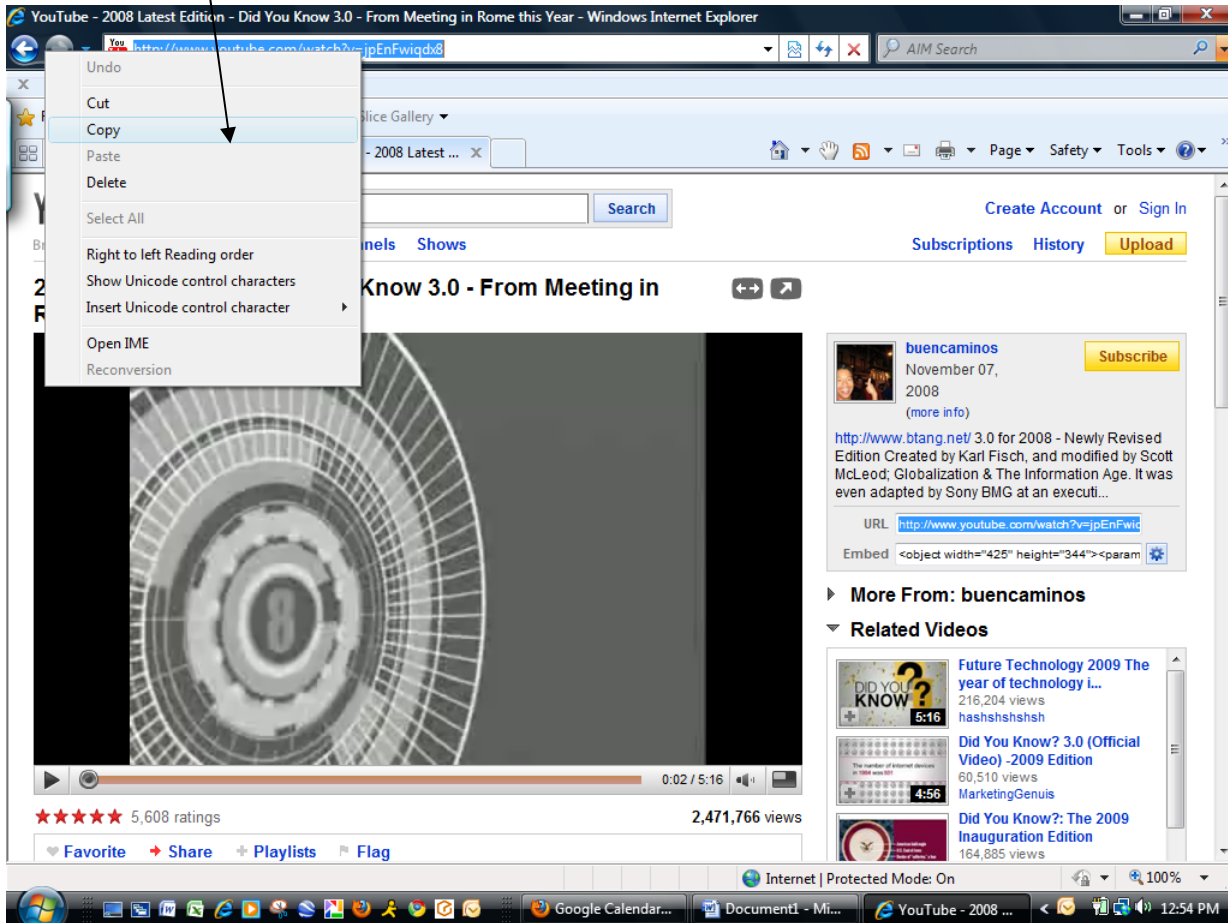

Open the internet browser and go to [www.youtube.com](http://www.youtube.com) then open a new tab in the same window and go to Media Converter by typing: <http://www.mediaconverter.org/> in the address bar and hit the Enter key. Click the “enter a link” button

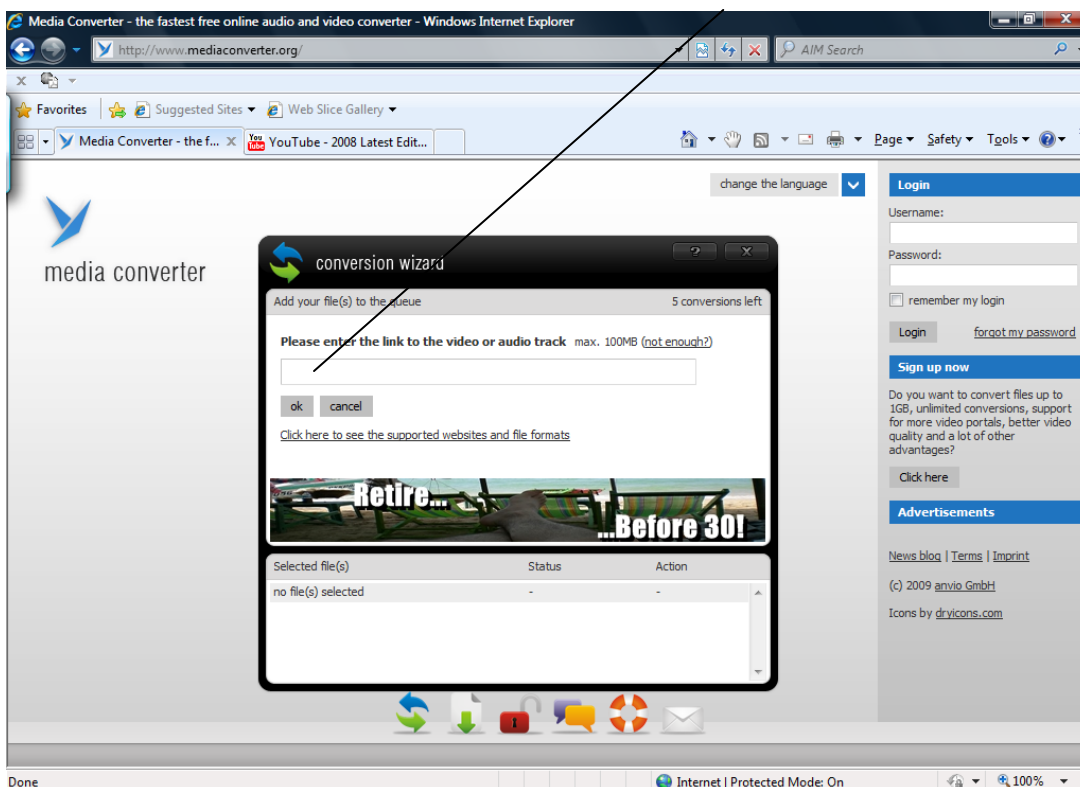

The following screen appears.

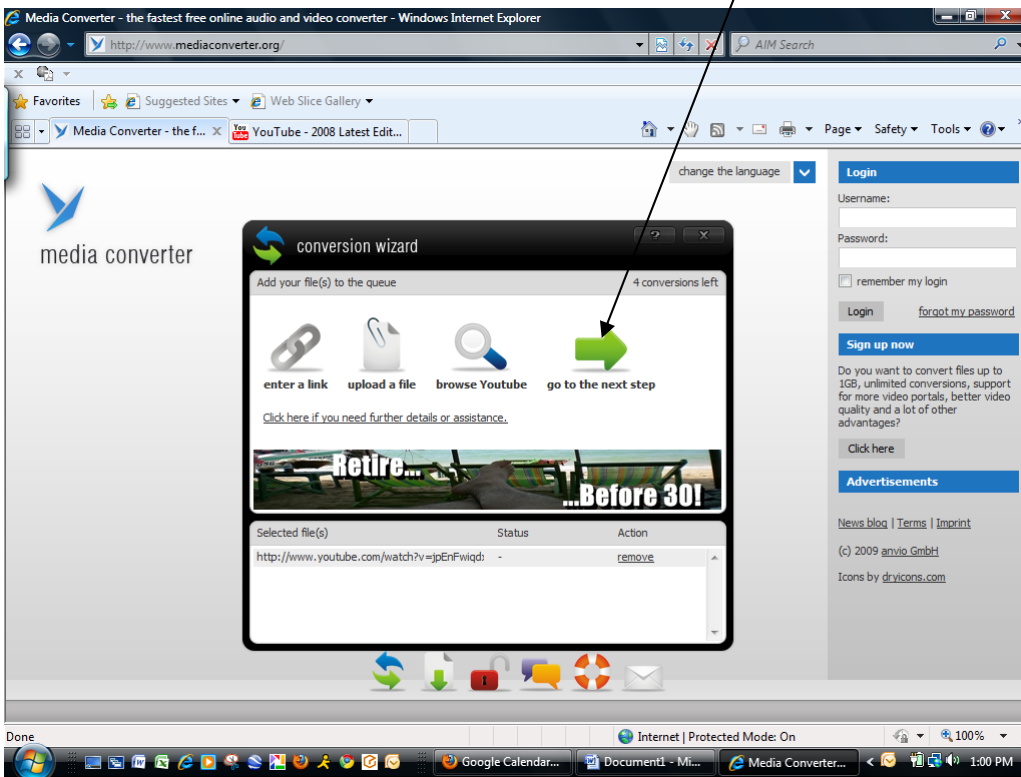

Click on the YouTube tab in your browser. Browse and locate the video you would like to download and convert. Highlight the URL and copy it using a right click and copy.

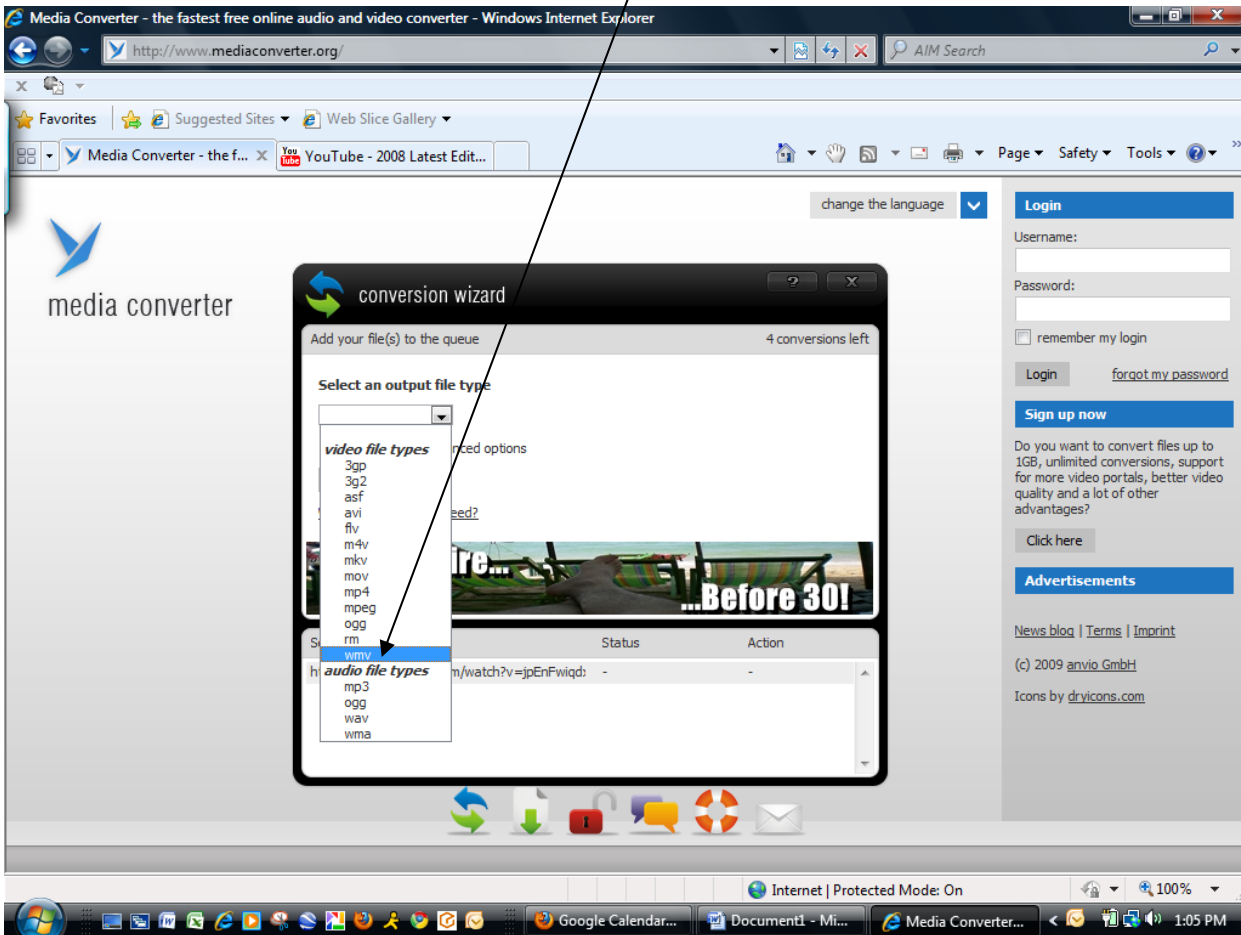

Click the media converter tab and paste the link into the box (right click choose paste) click OK

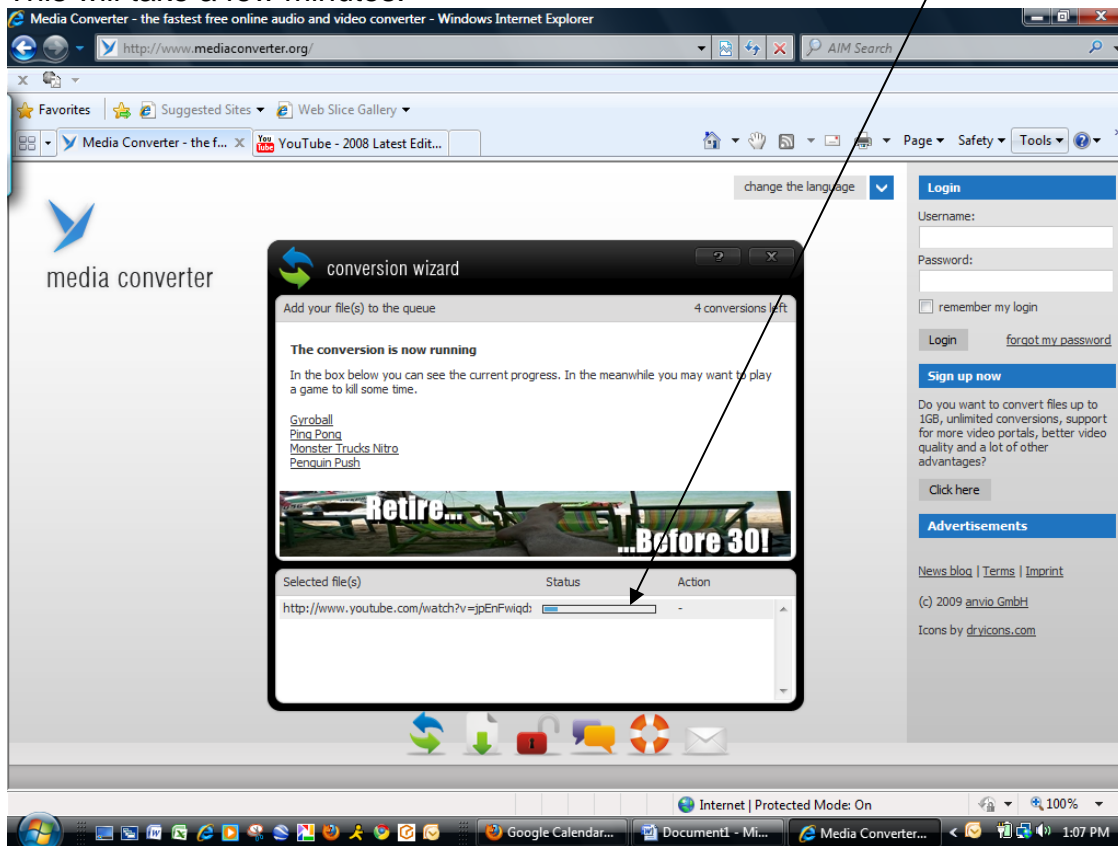

The link appears in the bottom of the conversion wizard box. Click the green arrow, go to next step.

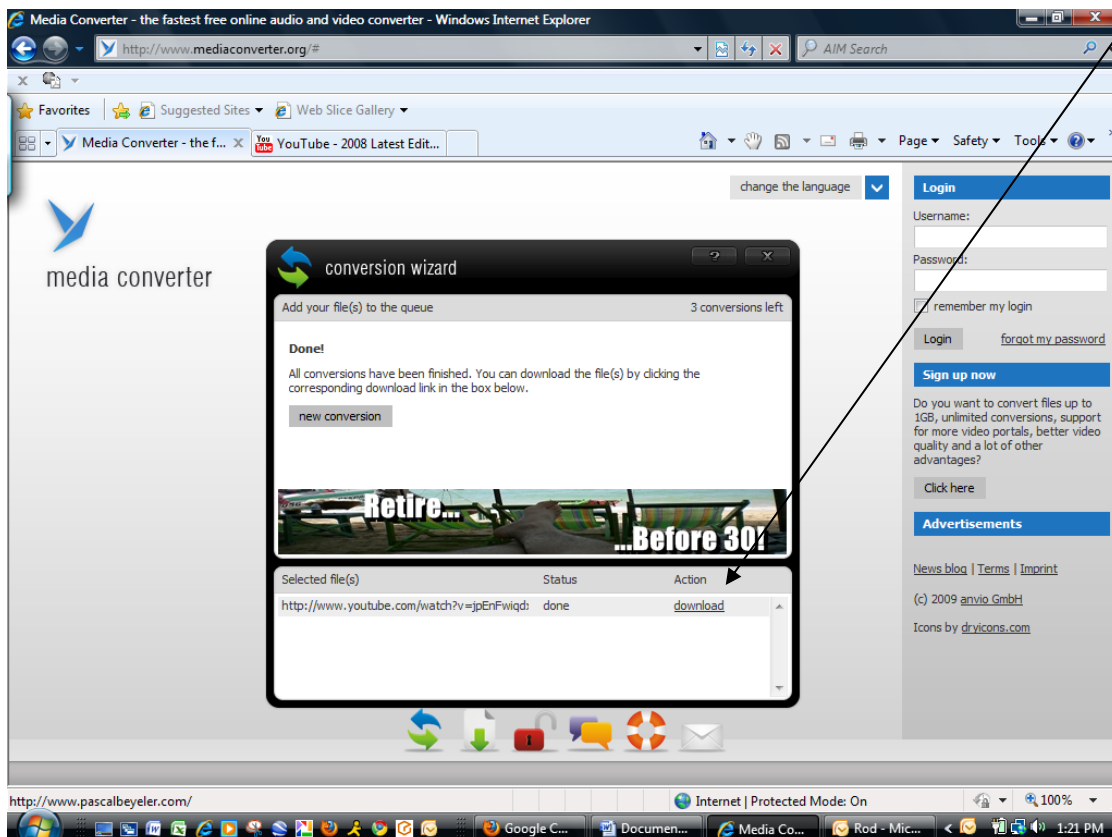

Click the arrow and select wmv for output file type.

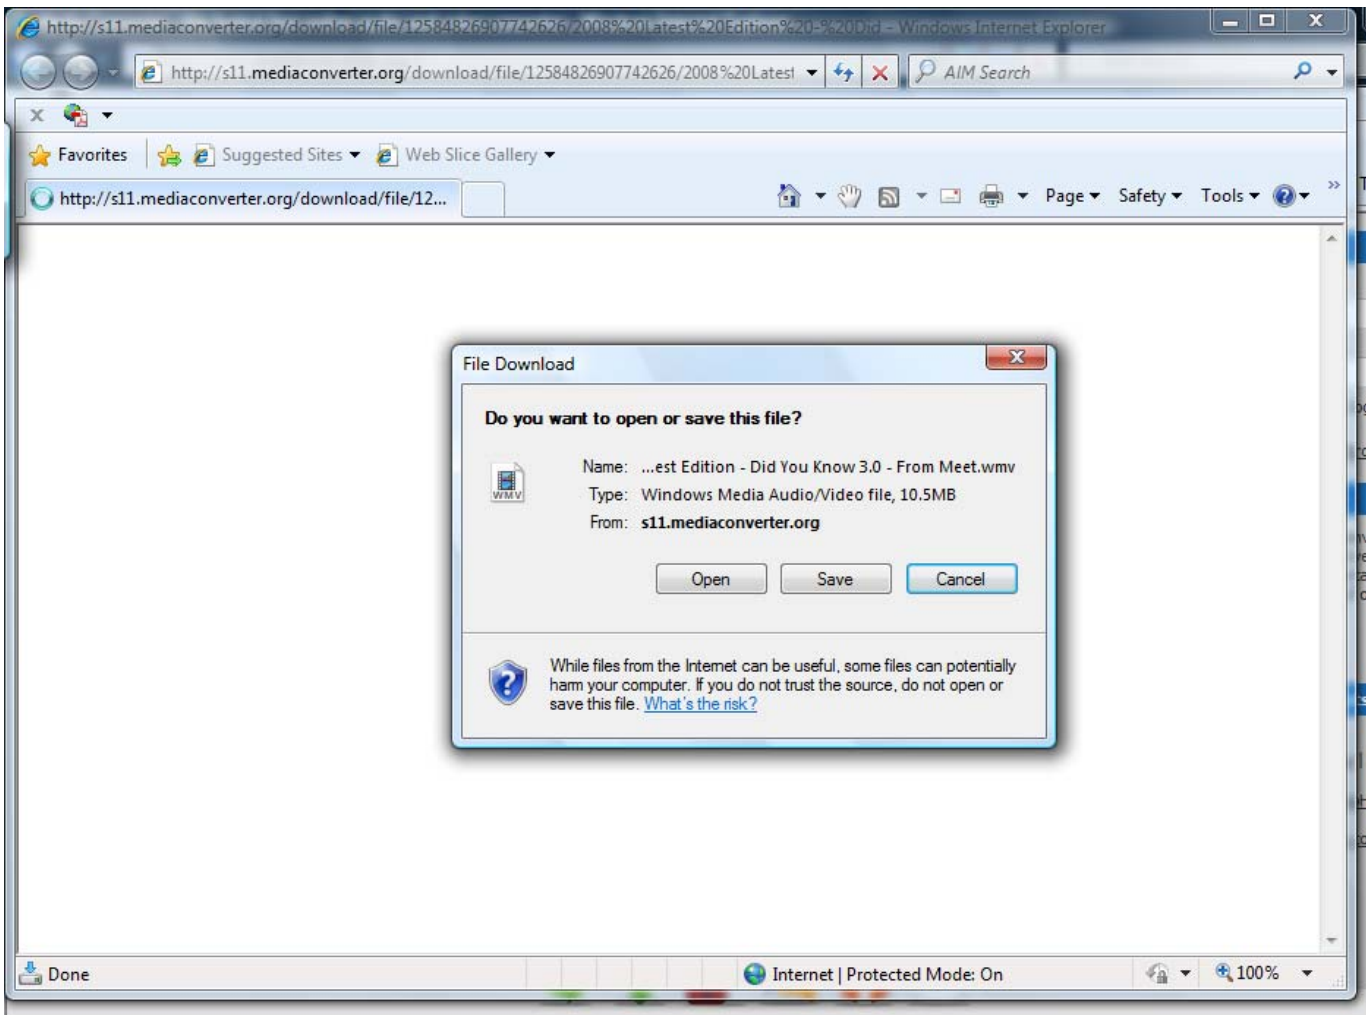

Click **okay** then click **start** when prompted. You should see a status bar that shows the progress. This will take a few minutes.

When the conversion is complete the following window appears. Under the action column click download to save the file to your computer.

Click the save button and choose the location you would like to save the video file, (My Documents or USB memory device). Please do NOT save to your H-Drive on the MWCS Servers at this time. In the future, we may have a special drive designated for these these files, but we do not at the present.

## Media Converter does have some limitations.

The screenshot shows the Media Converter website interface. A 'Sign up' modal window is open, comparing 'Free' and 'Premium' membership options. The background shows a 'conversion wizard' with a 'Please enter the link to the video' field and a 'Selected file(s)' section.
